Forensics Services - Laboratory Testing Guide 2024

RJ Lee Group's Criminal Forensics department has worked with more than 400 law enforcement agencies throughout the United States and abroad. We have been qualified as experts in 34 of the United States of America, Washington DC, Bermuda, the British and US Virgin Islands, the Cayman Islands, New Zealand, and Turks and Caicos for Gunshot Residue Analysis (GSR Testing). We are committed to delivering services that not only meet, but exceed, regulatory requirements and client expectations for value, consistency and reliability.

RJ Lee Group is accredited by ANAB for primer GSR analysis and gunshot distance determination. We are the only private laboratory in the United States accredited by ANAB International for gunshot distance determination. Our team offers exceptional turnaround time for GSR analysis including backlogs. Our lab initiated the use of computer-controlled scanning electron microscopy in the identification of GSR particles. We review and critique reports and data from other laboratories, and we are actively involved in the development of criteria for standardized procedures.

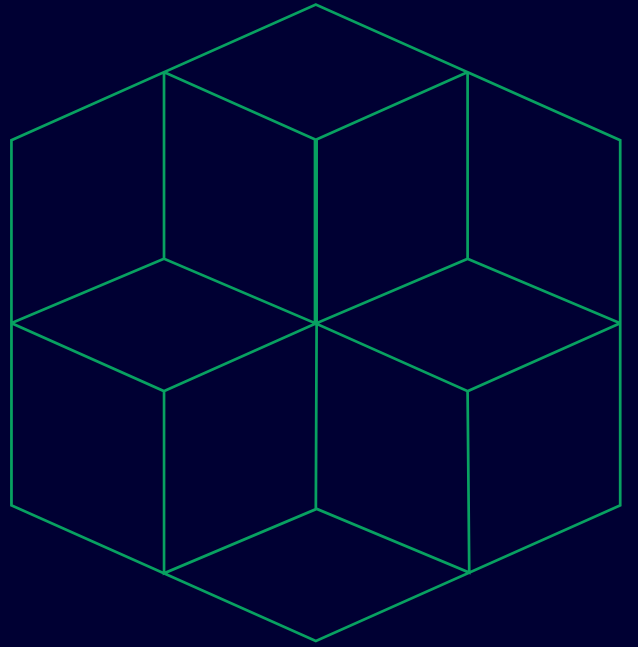

Forensic Services - Laboratory Testing Guide 2024
